E-mail: karan@junker.co.uk

Website: www.junker.co.uk

Welcome to this, our best catalogue yet! I was excited to this year pot a number of plants which we will be offering for the first time. Our new stock plants are establishing well and we have been busy in the propagation unit over the last couple of years. We're now starting to see the fruits of our endeavour as the first of these plants become available this autumn. We still have limited space though, so I wasn't able to pot very many of most things, so quantities are definitely limited. We are in the process of erecting another polytunnel which will relieve the congestion next year!

We remain committed to growing the most exciting plants to the best of our ability, and to giving you, the customer, the kind of personal service that seems to have almost disappeared from society these days. I make no bones about emphasizing this. We propagate from our own stock plants, and grow on, everything that we sell. We do not buy in to re-sell. It is our belief that too many plants are imported, with inherent establishment, pest and environmental concerns. I urge you to "Buy British"!

The intention with this list is that it is easier for you to print off (either completely or specific sections) allowing you to make notes of personal interest as you either walk round the nursery here, or research the plants at home. An increasing number of folk have access to the internet, so I encourage you to use this catalogue in conjunction with our website

www.junker.co.uk

where full descriptions can be found. I'm trying to bring the website up to date to reflect this new season's catalogue and to add descriptions of newly available items, but there are never enough hours in the day...

We're doing things a little differently here: we are growing an increasing amount of our stock in the open ground, to be lifted, root-balled and wrapped (not to be confused with "bare-root" which is never as satisfactory.) There are numerous advantages to this apparently "old-fashioned" method, not least of which is the production of hardier, more robust plants. They have an established natural root system, and are used to growing outside in the real world. Thus they are better acclimatised and will be far more tolerant of the extremes of weather we seem to be experiencing than soft plants pushed on in artificial conditions. We believe that the use of peat-based composts and plastic pots is not sustainable and so such, all our younger container plants are now grown in certified peat-free media.

Typically we start lifting in late-October / early November, dependant on the weather. The plants don't need to have completely lost their leaves, but they do need to have finished active growth for the season. We will

then continue lifting right through until March or so, but late planting can be risky in the event of a dry spring such as we've had the last couple of years. Lifting is weather dependant though, as we can't continue if everything is waterlogged or frozen solid.

I would encourage you therefore to make your plans and reserve your plants for when we can lift them. I will be starting to take confirmed reserves in September once we have completed our full "pre-season" stock take which will enable me to give you precise information on any plant of interest.

We are blessed with wonderful soil here, and magnificent views, so we are very exposed. Our plants will be hardy, that's for sure!

The following listing is intended to include all plants that will be available over the next season. Inevitably there will be things I've missed, and others will sell out since we only sell plants which we grow ourselves. So do please email me your list prior to ordering. In many cases there will be multiple sizes available. Our new site allows us to offer much larger specimens in addition to our normal range, including semi-mature maples that need to be seen to be believed!

We will be developing collections of a number of further genera which will beautifully complement our existing range. In time, examples of all our mother plants will be displayed in a natural setting, allowing full and meaningful comparison between cultivars to be made. This will not only look awesome, it will also be incredibly useful.

The first phase of this is our Woodland Quarry. We have planted most of the structure in the top section of that now and already it's looking fantastic. It was incredibly difficult to choose our favourite plants for inclusion, but we've worked hard to achieve year round interest in there. I've noted some of these against the catalogue listing in the coming pages. You're welcome to come and have a look and join us in watching it develop. Torsten has put so much effort into reprofiling the old quarry – it's really his project.

Our delivery service becomes increasingly relevant with our larger plants —most areas are accessible with patience. Please ask.

Visitors remain welcome by appointment only, so do please ring or email before visiting, to ensure that either myself or my son Torsten will be available to show you the plants.

Karan Junker

How to use this catalogue.

If you are interested in purchasing any of our plants, drop me through an email with your wish list. Give me an idea of what sort of size plants you would prefer and whether you wish to collect or have them delivered. Remember to include your full postal address including phone number and postcode. I will then reply with price, size and availability detail and we can progress from there.

I have once again produced a simple list rather than a descriptive catalogue. As we increase the number of varieties that we grow, particularly the number of cultivars within a given genus, so the quantity of any one variety decreases. This was making the descriptive catalogue increasingly unwieldy, and with current environmental awareness, I am also mindful of paper usage. Times change and the internet is becoming more ubiquitous. Thus my intention is that this booklet represents a list of plants that are available for Autumn 2013, or will be available over the coming season. Use it in conjunction with the website, which will be updated as often as my time allows, where full descriptions will be found. Helpfully, I have left lots of space on the pages here for you to make your personal notes. I have also indicated plants that were not available last year.

We are now growing our plants in an increasing number of different sizes which was also contributing to catalogue complications, as it was simply impossible to list all the options with their prices. In principle the price is determined by age rather than

physical size. Thus the website will show the starting price for the youngest plants. For example, I have Japanese maples in assorted sizes ranging from around £30 up to two thousand pounds, with a myriad steps in between. Something for everyone then, but bear in mind not all cultivars will be available in all sizes all the time. Some plants will sell out, and others may become available. In principle the starting size for most things is a 2 or 3 litre pot at an appropriate price, whilst the older, more mature plants tend to be growing on in the open ground where they can develop naturally, in most cases making a more compact, denser plant than their pot-grown equivalent. This more robust plant will need less staking and protection when planted.

As always, if you have any questions, don't hesitate to contact me. Be aware that the new site here is over 3 times the size of our previous holding, so I am not always in range of the phone. Thus email communications are preferable as I can deal with them at unsociable times!

“Gardening with Woodland Plants”

The premier horticultural publisher Timber Press commissioned me to write a book and I am delighted to report that not only is it available, but the reviews have all been jolly good (even if I do say so myself!)

The concept of Gardening with Woodland is so exciting; it looks at a number of ways of enhancing natural woodland as well as creating woodland areas in the garden, to whatever scale is appropriate; conveying the principle that a Woodland Garden can be created in even the smallest space. Early sections deal with the concepts and opportunities, as well as the practical aspects of preparation and maintenance, with well over half the book devoted to an eclectic compendium of plants suitable for Woodland cultivation; from the tiniest Woodland Floor bulbs and perennials up to trees with which to supplement the upper canopy. Some 350 colour photos will illustrate it.

Although an enormous amount of work, it was a huge amount of fun to write and I hope it gives equal pleasure to those who read it. My dream is to inspire people, dedicated gardeners and uncertain novices alike, to really make the most of their Woodland, or to create their very own. I want you to see the group of trees at the bottom of the garden as an opportunity rather than a problem. Even the tiniest garden can embrace the Woodland ethos with sympathetic underplanting of existing features, whether they be shrubs, individual trees or hedges.

We are currently offering my book at a discounted price of £25 plus p&p making a total of £32.

Please make cheques payable to me personally - "K. Junker" and send them to me here at the nursery. Thank you for your support.

TERMS OF BUSINESS - Please read these. Placing of an order implies acceptance of these terms. **They are intended to help you, and to prevent misunderstandings.**

How to order.

- * Email me a list of the plants that interest you. karan@junker.co.uk
- * Tell me if you would like larger plants if available.
- * Tell me whether you need delivery or collection.
- * **Include your postal address and telephone number.**
- * Indicate if the delivery address is different to your own or if there are any dates when delivery cannot be made ie holidays. This will prevent your plants arriving whilst you are away.
- * We reserve the right to levy a 25% re-stocking fee on accepted orders which are subsequently cancelled by the customer.

Availability.

- * All plants are offered subject to being unsold at the time of processing your order.
- * If we accept an order and payment for a plant which subsequently is unavailable for any reason, our liability is limited to the refund of the price paid for the plant.

How to pay.

- * To simplify the ordering process, we require payment with order, once availability is confirmed. This can be by cheque or bank transfer. The latter is preferable—please ask for my bank details.
- * Carriage pricing is complicated. For a full explanation, see our website. If in doubt as to how much it will cost, please contact me.
- * If your order will be despatched in more than one batch, carriage will be payable for each part.
- * As a small business, **we do not accept credit cards.** This is due to the fees charged by the credit card companies. It would simply result in price increases.
- * All prices include VAT, currently at 20%.

Problems.

We try hard to ensure that problems do not occur. Inevitably, some occasionally do, and then we try as hard to solve them!

- * We believe that all our plants are true to name. If this is proven not to be the case, our liability is limited to the refund of the purchase price of the original plant or replacement, at our discretion.
- * If we agree to replace a plant, the customer will pay the appropriate carriage charge.

IMPORTANT

- * We cannot and will not be held responsible for the plants once in the hands of the carrier. These days, no 24 hour carrier will insure plants. I may not agree with this, but it is out of my control. I regret but stress that **you use the 24 hour carrier at your own risk.** The “man and van” option is therefore much safer.
- * **We will not be responsible for damages which occur in transit.**
- * **We cannot and will not be held responsible for failures due to inclement weather conditions or unsuitable planting sites.**

“If you are pleased with our service, please tell your friends. If not, then please tell us.”

01823 400075

If using SatNav, the co-ordinates are:

N 051° 01.214'
W 003° 17.615'.

Be careful how you swing into our entrance, it turns back on itself. You need the gate with the letterbox on it. Open the gate and drive in, but please close it behind you (to keep the dogs in and safe and the bunnies out!) Drive on up, following the parking sign. Do not touch the electric fence—it will hurt!
Be aware there are no facilities available here.
Remember that we still do not take credit card or other plastic.
